

Human FGFR2 beta (IIIc) Protein

Cat. No. FGR-HM1BC

Description

Source	Recombinant Human FGFR2 beta (IIIc) Protein is expressed from HEK293 with His tag at the C-Terminus. It contains Arg152-Glu377.
Accession	P21802-1
Molecular Weight	The protein has a predicted MW of 26.4 kDa. Due to glycosylation, the protein migrates to 45-60 kDa based on Bis-Tris PAGE result.
Endotoxin	Less than 1EU per μg by the LAL method.
Purity	> 95% as determined by Bis-Tris PAGE > 95% as determined by HPLC

Formulation and Storage

Formulation	Lyophilized from 0.22 μm filtered solution in PBS (pH 7.4). Normally 8% trehalose is added as protectant before lyophilization.
Reconstitution	Centrifuge the tube before opening. Reconstituting to a concentration more than 100 $\mu\text{g}/\text{ml}$ is recommended. Dissolve the lyophilized protein in distilled water.
Storage	-20 to -80°C for 12 months as supplied from date of receipt. -80°C for 3 months after reconstitution. Recommend to aliquot the protein into smaller quantities for optimal storage. Please minimize freeze-thaw cycles.

Background

Four distinct genes encoding closely related FGF receptors, FGF R1 - 4, are known. All four genes for FGF Rs encode proteins with an N-terminal signal peptide, three immunoglobulin (Ig)-like domains, an acid-box region containing a run of acidic residues between the IgI and IgII domains, a transmembrane domain and the split tyrosine-kinase domain. Multiple forms of FGF R1 - 3 are generated by alternative splicing of the mRNAs. A frequent splicing event involving FGF R1 and 2 results in receptors containing all three Ig domains, referred to as the alpha isoform, or only IgII and IgIII, referred to as the beta isoform.

Assay Data

Bis-Tris PAGE

Human FGFR2 beta (IIIc) on Bis-Tris PAGE under reduced conditions. The purity is greater than 95%.

SEC-HPLC

Assay Data

The purity of Human FGFR2 beta (IIIc) is greater than 95% as determined by SEC-HPLC.

ELISA Data

Human FGFR2 beta (IIIc), His Tag ELISA

0.5µg Human FGF basic, No Tag Per Well

Immobilized Human FGF basic, No Tag at 5µg/ml (100µl/well) on the plate. Dose response curve for Human FGFR2 beta (IIIc), His Tag with the EC50 of 1.18µg/ml determined by ELISA.
